

CEPAC TILE

Where Excellence in Quality & Service Unite!

Made in JAPAN

As we mark our 30th year of providing exclusively Japanese porcelain mosaics to the “market”, we would like to take the opportunity to thank all our loyal customers who have partnered with us and supported the Cepac Collection!

We would also like to thank our trading company in Japan and all the factories they work with on our behalf. The collections we have created together over the last 30 years have gone from traditional to modern, funky and whimsical. They have been created for the most part, by using traditional Japanese glazes that emulate those utilized by Ceramicists hundreds of years ago. The mineral based “Yohen” glazes react in the kiln when fired at a high temperature over a longer period and the result is a deep, rich, varied glaze, with a moving or translucent finish. These glazes embrace the essence of Japanese pottery and ceramics, which is what sets us apart from the rest!

Last, but certainly not least, we say THANK YOU to our dedicated employees many of whom have been with us more than 20 years. Their loyalty and commitment to excellent customer service is beyond compare and we are so very grateful for all they do!

Cepac Tile...

CEPAC Recycling Program

Since opening our doors in 1989 Cepac Tile has been conscious and diligent about recycling and conserving. We feel that it is our duty to try and preserve as many resources as possible.

We incorporate recycling into our workdays with little things like re-using the paper we accumulate from unnecessary faxes received for memos or shredding it for packing material. We also use China instead of paper plates and glass instead of plastic or styrofoam cups, in our lunch rooms.

We also recycle and conserve on a larger scale by partnering with manufactures that share our commitment to the environment. These manufactures use recycled ceramics to create the bisques for many of our product lines. Listed below you will find an alphabetical listing of our product lines that contain recycled content and the percentages they contain.

Recycle Bisques Percentage List

Item	Page	Re-Cycle Bisques Percentage

Disclaimer

Variations of shade are inherent characteristics of all kiln fired products.

To ensure satisfaction, please visually inspect all merchandise prior to installation, as use signifies acceptance.

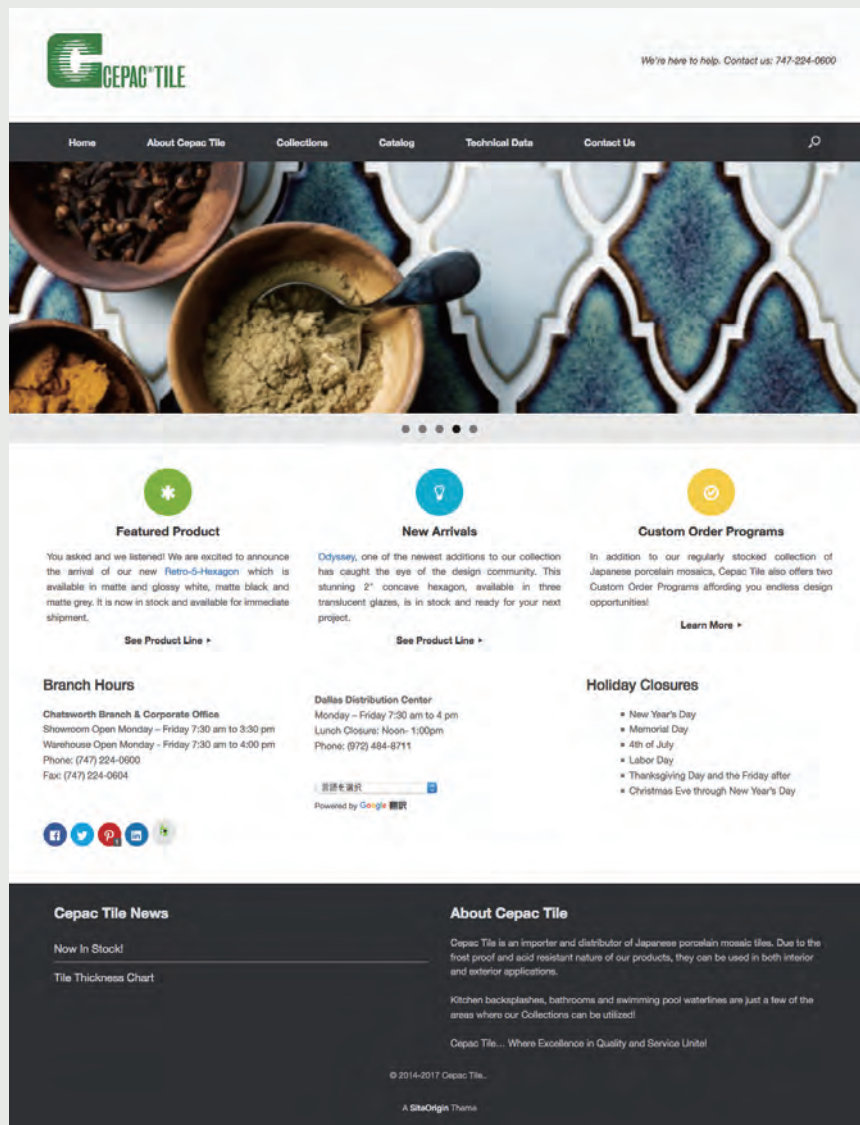

We will endeavor to resolve any issues that may arise with material purchased, prior to installation.

Please note that the darker colors in the Cepac Collection are also more susceptible to showing surface scratches and are not necessarily recommended for installations on horizontal surfaces.

While the majority of our products are frost proof and acid resistant porcelain, there are several items that do not meet these criteria and have been labeled accordingly.

In this regard we would stress the importance of referring to the footnotes throughout the catalog.

Due to the limitations of printing inks, colors shown in this catalog may differ from the actual product. Samples can be provided for verification of actual color.
